Assignments → CVS

Assignment 1:

After correcting the code you are welcome to commit your files to the CPH STL CVS repository: all files related to your benchmark should be put to a new directory `X` under

`~/CPHSTL/Program/Algorithm/Benchmark/`

If you are not willing to take the fight agaist our CVS system, you can just sent me the files in a tar package.

Assignment 3:

You can commit your review to the CPH STL CVS repository (or just send a package to me so I will do it). For further instructions, see

`http://www.cphstl.dk/Review/README`

Assignment 6:

Selected essays will be published in two CPH STL reports: Essays on generic programming and Essays on concepts. You will get an invitation if your essay is being selected for these collections.
