

HOW TO PEEL YOUR FUNCTION - TOP-DOWN

1. "Def" dat shit up and make your header!
2. Take some statements and put'em in yo block!
3. Call dat b*tich!

```
1 ▼ def peel_banana():
2     pinch = input("where do you pinch (top or bottom)?: ")
3 ▼     if pinch == ("top"):
4         print ("wrong pinch bitch!")
5         peel_banana()
6     elif pinch == ("bottom"):
7         print("Right on mofokker!")
8
9
10 peel_banana()
```
